

Year-End Performance Report for Joe Smith

Position: Senior Software Engineer

Department: IT

Company: Random Corp

Year: 2023

Overview

Joe showed up to work every day, which is great, but he mostly just worked on whatever he felt like and avoided team meetings. He wrote a lot of code, though no one really knows what it does or if it's even used.

Key Achievements

- **Random Code:** Wrote about 10,000 lines of code, none of which anyone understands. We're pretty sure it does *something*.
- **Avoiding Responsibility:** Successfully dodged project management duties, leaving the rest of the team to figure out what was happening.
- **Office Coffee Expert:** Made some decent coffee in the break room. It's the one thing everyone agrees he excels at.

Areas for Improvement

- **Communication:** Actually talking to the team about what he's doing would be nice.
- **Code Clarity:** Maybe write code that other people can read or understand? Just a thought.

Goals for 2024

- Attend at least *one* meeting, preferably while awake.
- Write some documentation, or at least explain why he won't.
- Get his code into production... somewhere.
